

PROJECT SOLUTIONS

NEWBUILD FOR OFFSHORE OPERATIONS

Project solutions Proven technology

SMST offers a wide range of equipment for worldwide offshore operations.

In addition to our standardized systems, we supply innovative product solutions that are developed in close cooperation with our clients. The unique formula of in-house design, multi-disciplinary engineering, and extensive experience, guarantees outstanding systems for challenging projects.

Markets

- ✔ Offshore wind
- ✔ Dredging
- ✔ Search & rescue
- ✔ Offshore & subsea construction
- ✔ (Geotechnical) drilling
- ✔ Decommissioning
- ✔ Deepsea mining
- ✔ Subsea rock installation
- ✔ Navy & Marine
- ✔ Subsea energy infrastructure

Key Assets

Project solutions

- ✔ Over 25 years of experience with offshore systems
- ✔ Extensive knowhow on modular setups & drive technology
- ✔ Innovative product development
- ✔ Highly skilled team of professionals
- ✔ 24/7 service & lifetime support
- ✔ Green production

Efficiency

- ✔ Highest energy efficiency
- ✔ Cost effective solutions

Safety

- ✔ Active heave & 3D motion compensation
- ✔ Integration of automation features
- ✔ Design & certification according to class authorities

About SMST

SMST designs and builds turnkey systems for the safe transfer of personnel and cargo for global offshore operations. SMST has the entire process in-house: from design to production, assembly and testing to worldwide installation, service & aftersales.

All SMST's products have a modular-based design philosophy. The complete range comprises modular components that turn into systems that fit all project-specific requirements.

SMST
